Resistant Hook

Healsafe Max5 Ligature

The Healsafe Max5 Hook features a familiar, ligature-resistant design that combines safety with everyday functionality. Made from flexible material, it supports clothing or towels but bends under forces exceeding 5 kg, allowing ligatures to slide off without breaking. Its multidirectional release helps reduce injury risks, even near doors. Available in White, Grey, Black, Beige, and Magenta, in packs of 5 or 50.
