

STERIRACK™ SYSTEM

THE GOLD STANDARD FOR CSSD AND THEATRE STORAGE AREAS IN HOSPITALS

IMPROVE INFECTION CONTROL

MAXIMISE AVAILABLE SPACE

INCREASE PATIENT CARE TIME

THE EXPERTS IN TAILORED STORAGE SOLUTIONS FOR HEALTHCARE

Delivering the gold standard storage solution for MDRD and Surgical Services

If you work in healthcare, you already know that sterile consumables must be handled and stored in a manner that maintains the integrity of packs and prevents contamination from any source of dust, vermin, sunlight, water and condensation.

This is where our gold standard STERIRACK™ System comes into its own! Designed and manufactured in Australia and now in the USA by SpaceLogic, STERIRACK™ System is the complete modular consumables storage solution that can be configured in myriad ways to suit your space and application.

Read on to find out why STERIRACK™ is the premier solution for Surgical Services in Canadian hospitals today, and enjoy testimonials, images and videos from our clients who have benefited from a STERIRACK™ transformation in their facility.

Increase patient care time

With STERIRACK™ System by SpaceLogic, nurses and healthcare personnel can now spend less time hunting through storerooms, and more time devoted to face-to-face patient care.

These time efficiencies provide hospitals and healthcare centres with impressive Return on Effectiveness (ROE), with some facilities enjoying time savings of up to 50%.

Introduce gold standard healthcare storage systems today. You'll never look back.

Improve infection control

SpaceLogic leads the world in healthcare storage, exceeding Australian standards for best practice and infection control.

Rounded corners and smart design protect consumables from damage and contamination. Wire baskets and shelving provide air circulation, and prevent dust and dirt build-up.

Hard-to-clean, outdated timber joinery is no longer necessary with freestanding STERIRACK™ System and fully integrated STERIRACK™ Medical Trolleys and Carts.

Maximise available space

STERIRACK™ is the complete modular system. Versatile and customisable, this system can be configured to suit your available space and application.

Our experts are ready to provide room layouts, 2D/3D visualisations, and details on exactly how much additional storage capacity you'll enjoy with your new STERIRACK™ installation.

Contact one of our consultants today and begin your hassle-free journey to the gold standard healthcare storage solution.

TESTIMONIAL NEXUS GROUP OF HOSPITALS

Nexus Group of Hospitals strives to deliver best practice models of patient care, influencing positive change in the broader healthcare market. They measure their success through better patient outcomes, improved patient experience, open collaboration with stakeholders, and more efficient use of the healthcare system's limited resources.

“ *When I was appointed as General Manager to project lead the Greenfield-Orange Private Hospital, one of the first companies I engaged with was SpaceLogic. The company's workmanship, superior quality of products offered, and the professionalism of Matthew Scott and his team appealed to me as a customer. The product meets ISO standards for the operating theatre, the design is ergonomically fit for purpose and the structure of the shelves are solid, made with meticulous detail, and are compliant with health and safety regulations.* ”

Mesha Premalal, General Manager/Director of Nursing, Orange Private Hospital

What is STERIRACK™ System?

STERIRACK™ System is a range of high quality components and accessories that mix and match to create tailored storage solutions for hospitals and healthcare facilities. As the most popular clinical space management solution in the world today, STERIRACK™ has been designed and developed to meet the needs of healthcare professionals, using feedback from our valued clients.

STERIRACK™ components are used to build racking, basket and shelving installations, workstations, benches, trolleys, carts and other products, delivering a fully integrated range of products to increase efficiencies.

Racking is modular and is available in a variety of heights and depths, and can be joined together in any length. Once set up, the racking can be configured with any arrangement of baskets, shelves and/or pharmacy drawers, as well as other components and accessories. These configurations can be changed at any time, creating a future proof system.

STERIRACK™ System includes a huge range of Trolleys and Carts that fully integrate, sharing the same baskets, shelving and other accessories used in STERIRACK™ room installations or stand-alone modules, benches and workstations.

Colour coding in storerooms delivers huge cost savings and time efficiencies. STERIRACK™ Click 'n' Clip Coloured Label Holders are available in a choice of 13 vibrant colours. They click together both vertically and horizontally, and clip to STERIRACK™ baskets and shelving. Post Strips are available in the same range of colours.

For the ultimate in efficiency, best practice and infection control you simply can't go

past STERIRACK™, SpaceLogic's revolutionary, fully integrated healthcare storage system. Put simply our flagship STERIRACK™ System is a game changer, worldwide.

STERIRACK™ System includes:

- Racking, Wire Shelving and Baskets, and Pharmacy Drawers
- Workstations and Benching (mobile, static and enclosed) with stainless steel or Staron benchtops
- Trolleys and Carts (open and enclosed)
- Compact Overhead Rail Units

STERIRACK™ Accessories include:

- Wire Baskets (standard and fine mesh) in a range of sizes
- Shelving (fixed and adjustable) in a variety of sizes and styles
- Basket Dividers and Drop-in Bins in a range of sizes
- Label Holders and Post Strips in a choice of 13 vibrant colours
- Aisle Signs and Bay Signs
- Shelf Dividers and End Ledges in a range of sizes
- Catheter Hooks and Crutcher Racks
- Suture Shelves, Catheter Baskets and more

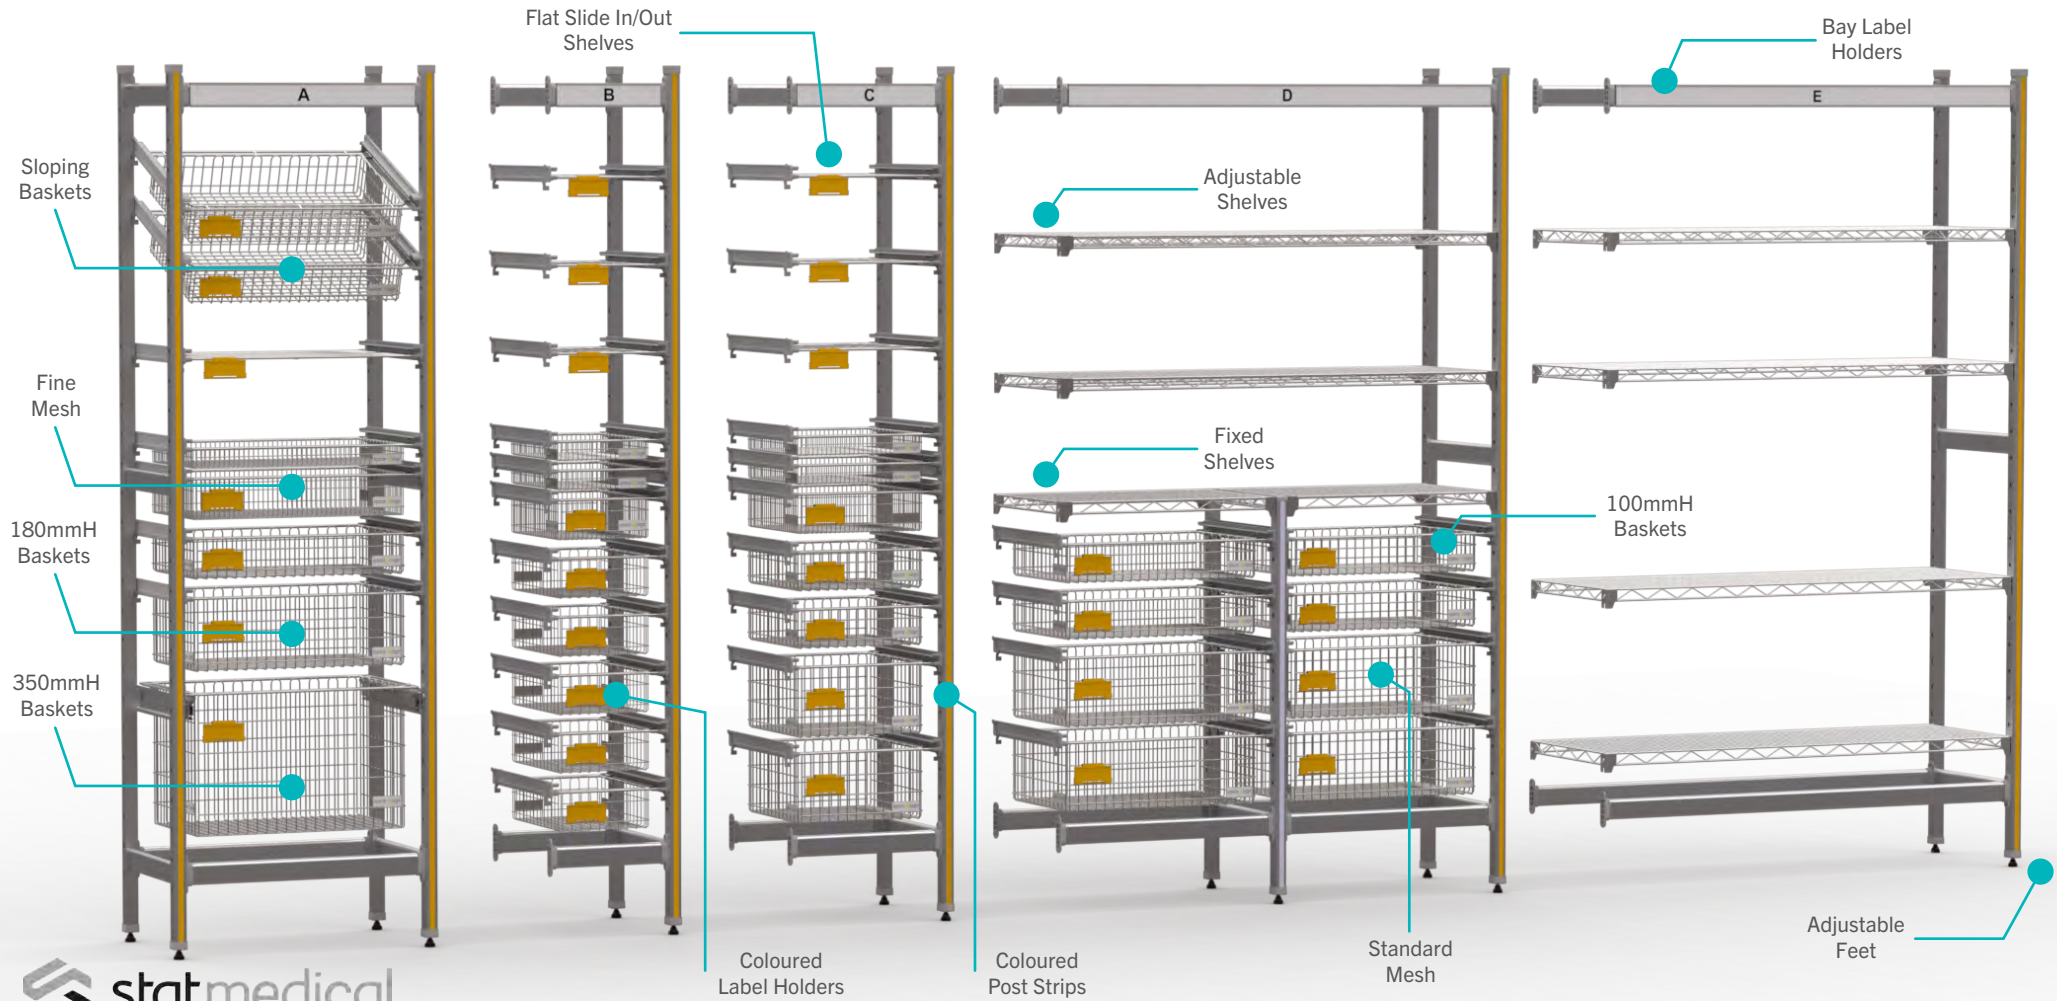

All images in this presentation are basic examples only, and are meant as inspiration for MDRD and Surgical services. The complete and comprehensive range of STERIRACK™ components and accessories can be viewed in the SpaceLogic Product Catalogue.

Fixed Bay

Customised overhead rail units in any configuration you choose

Although overhead rail units are not always the answer for maximising space or reducing risk, and are regularly being replaced with STERIRACK™ racking systems, these rail units definitely have a purpose and are very well suited in particular applications.

Fully customisable in size, these units utilise baskets and/or flat shelving, as well as accessories, configured in any way to suit your requirements.

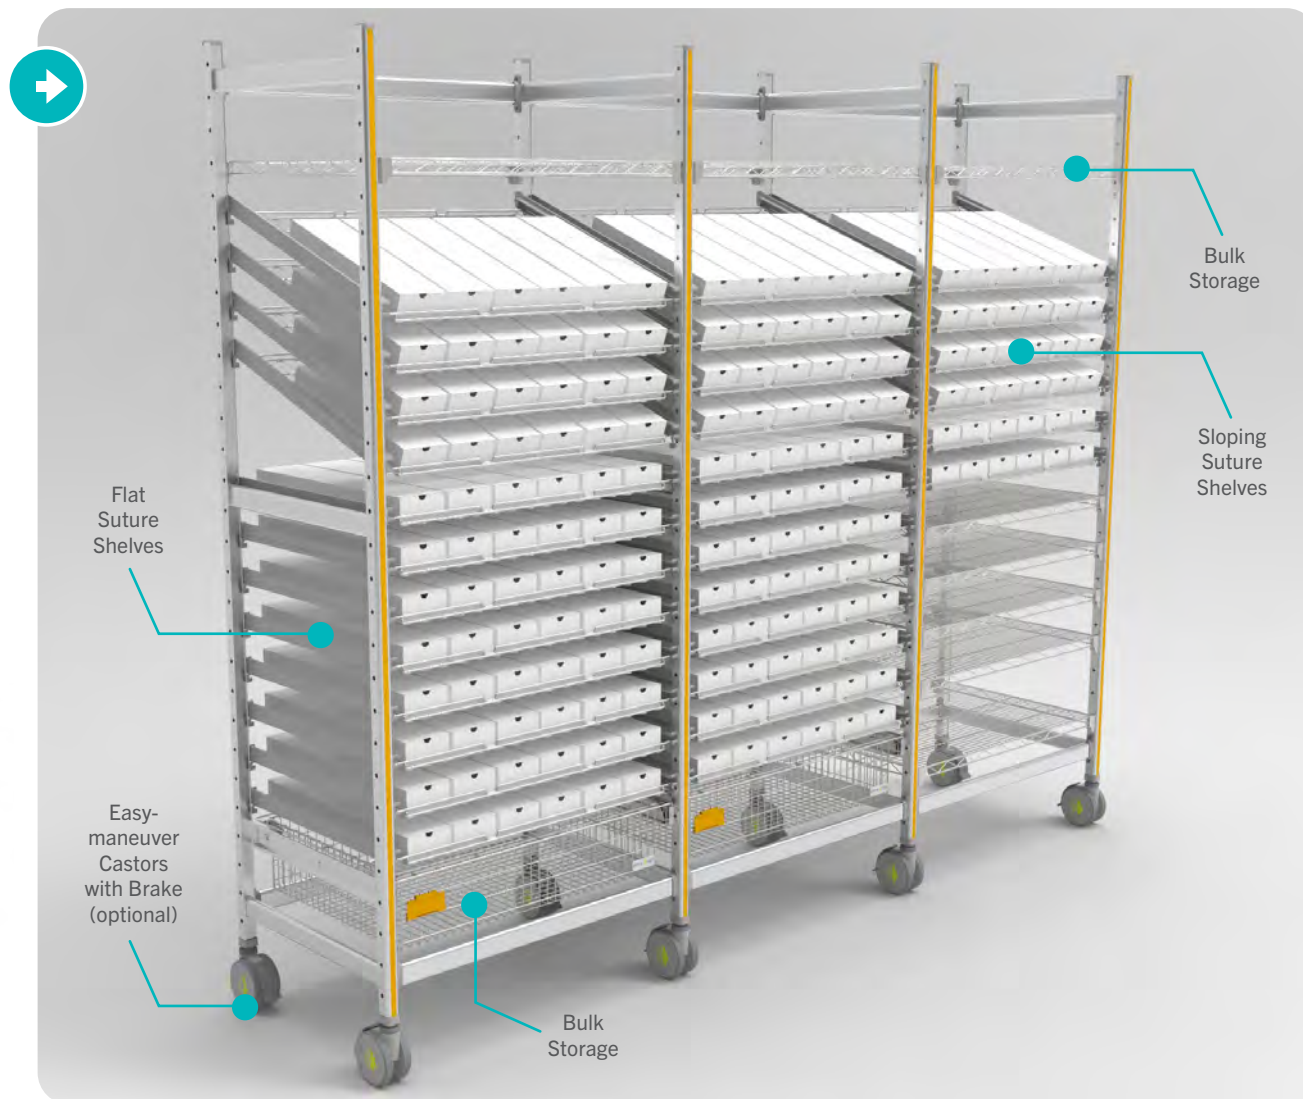

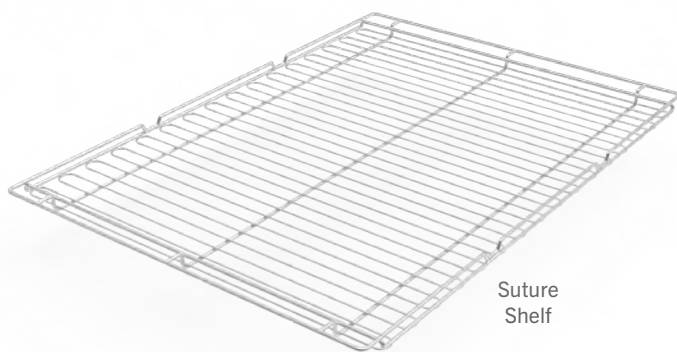

Speak with a SpaceLogic Consultant about the pros and cons of implementing overhead rail units in your facility, and let us design a configuration to exactly suit your requirements.

Suture Shelves create purpose-specific mobile Suture Racks

Yet another recent innovation from SpaceLogic, these Suture Shelves are used to create mobile Suture Racks in any length or height.

Choose a Suture Rack from our standard range or contact your SpaceLogic Consultant to design your own configuration.

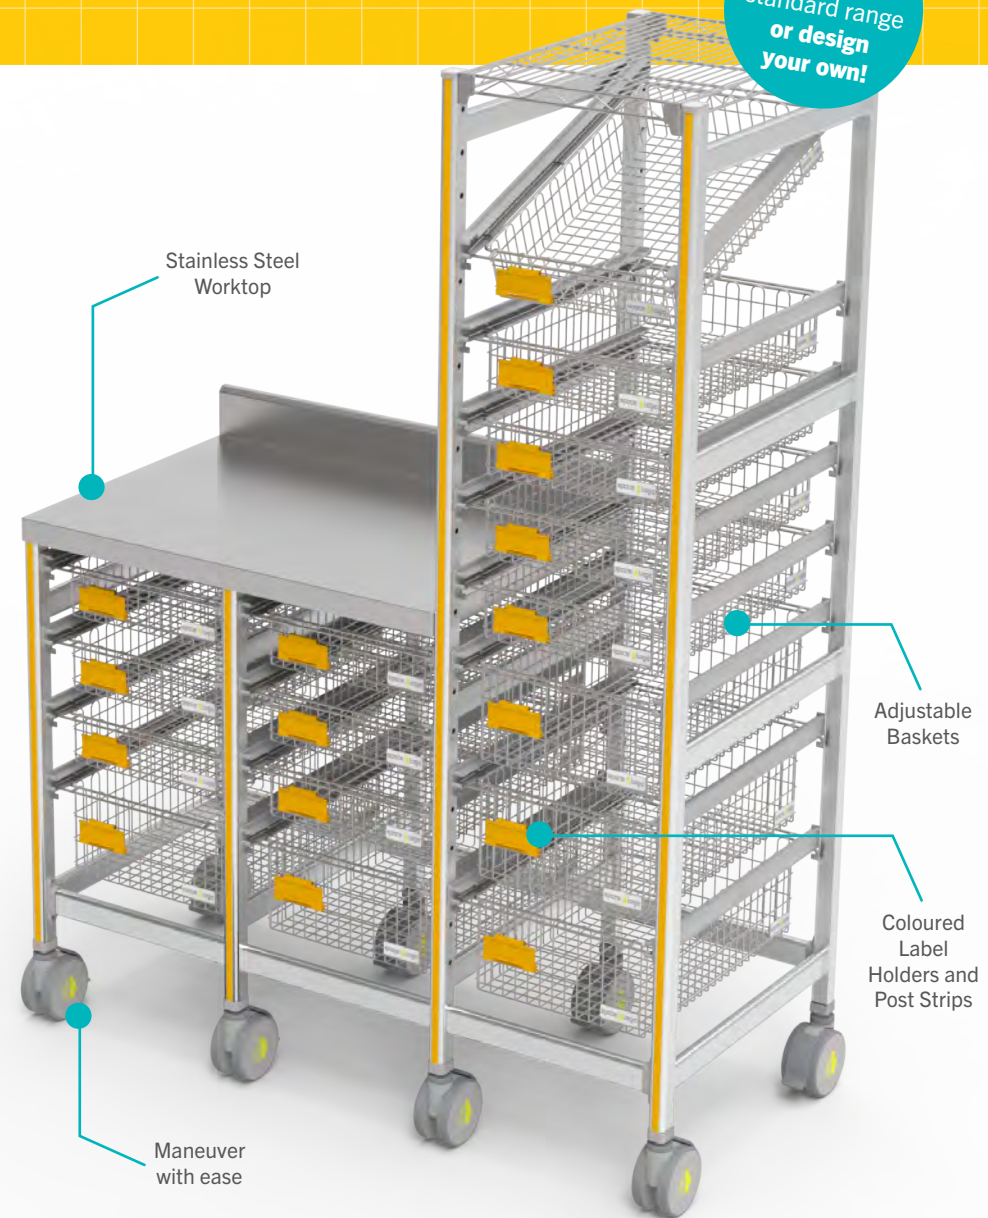

STERIRACK™ SYSTEM MOBILE WORKSTATIONS

Choose from our standard range or design your own!

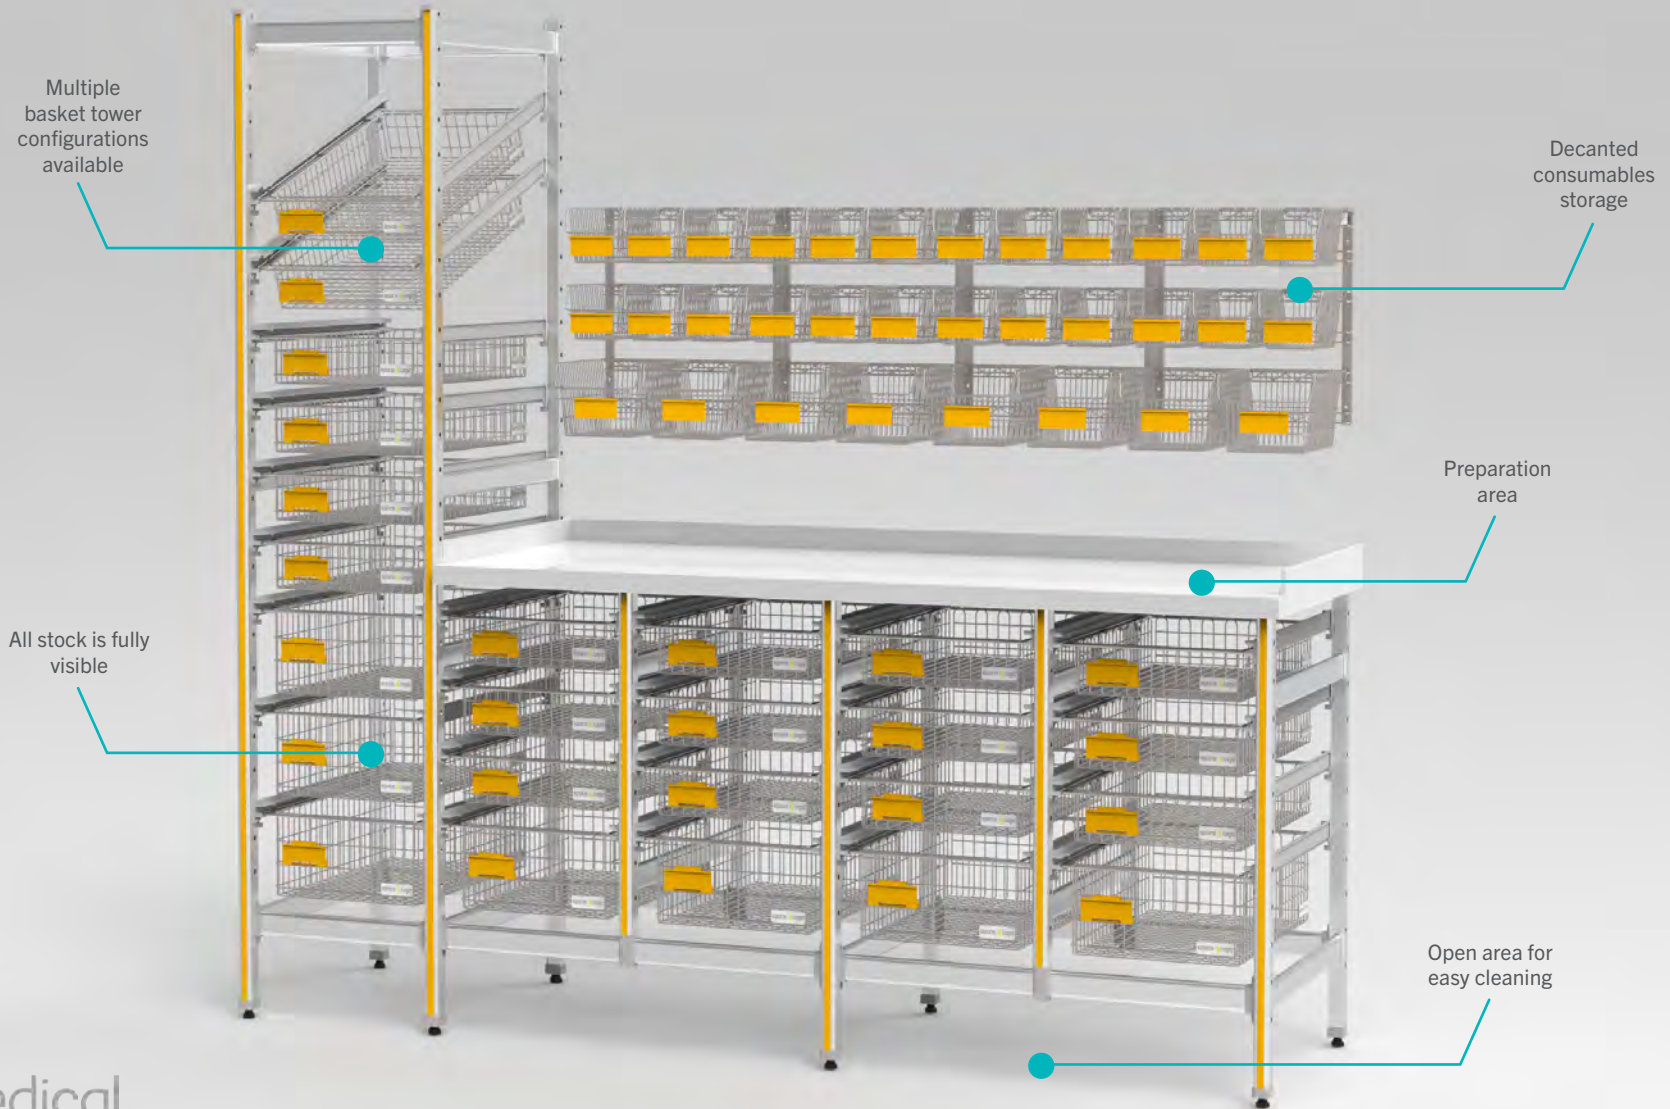

STERIRACK™ Mobile Workstation have been designed specifically for Anaesthetic Bays outside operating rooms and are perfect for storage of frequently used consumables. Choose from our range or design your own.

- A range of wire baskets in standard or fine mesh are available in sizes to suit your application
- Different coloured label holders and post strips can be used for each workstation/theatre to increase efficiencies and improve methodology.
- These workstations replace non-compliant joinery/carpentry that is fixed in place and gathers dust and other pathogens
- STERIRACK™ Mobile Workstations are super easy to clean in and around for maximum infection control
- Cross contamination is eliminated by using STERIRACK™ Mobile Workstations and Trolleys with interchangeable baskets.
- Stainless steel or Staron benchtops are provided for a sterile environment
- Custom heights and widths are available to suit your room layouts

The ideal OR set-up cart

The perfect Operating Room Set-up cart available in a standard range of configurations, or customised in a configuration to suit your requirements. Reconfigure at a moments notice for any procedure, with a mix of consumables, instrument trays and large custom pack storage areas.

These innovative carts can be colour coded for each OR or different procedure. Medical grade, non-marking, anti-static, noise free 125mmH castors allow carts to maneuver in, out and around busy environments with ease.

All trays, baskets and shelves are interchangeable with those used in STERIRACK™ System storeroom installations. PVC covers can be tailor-made to suit the height and variation you choose.

The ultimate medical cart for healthcare

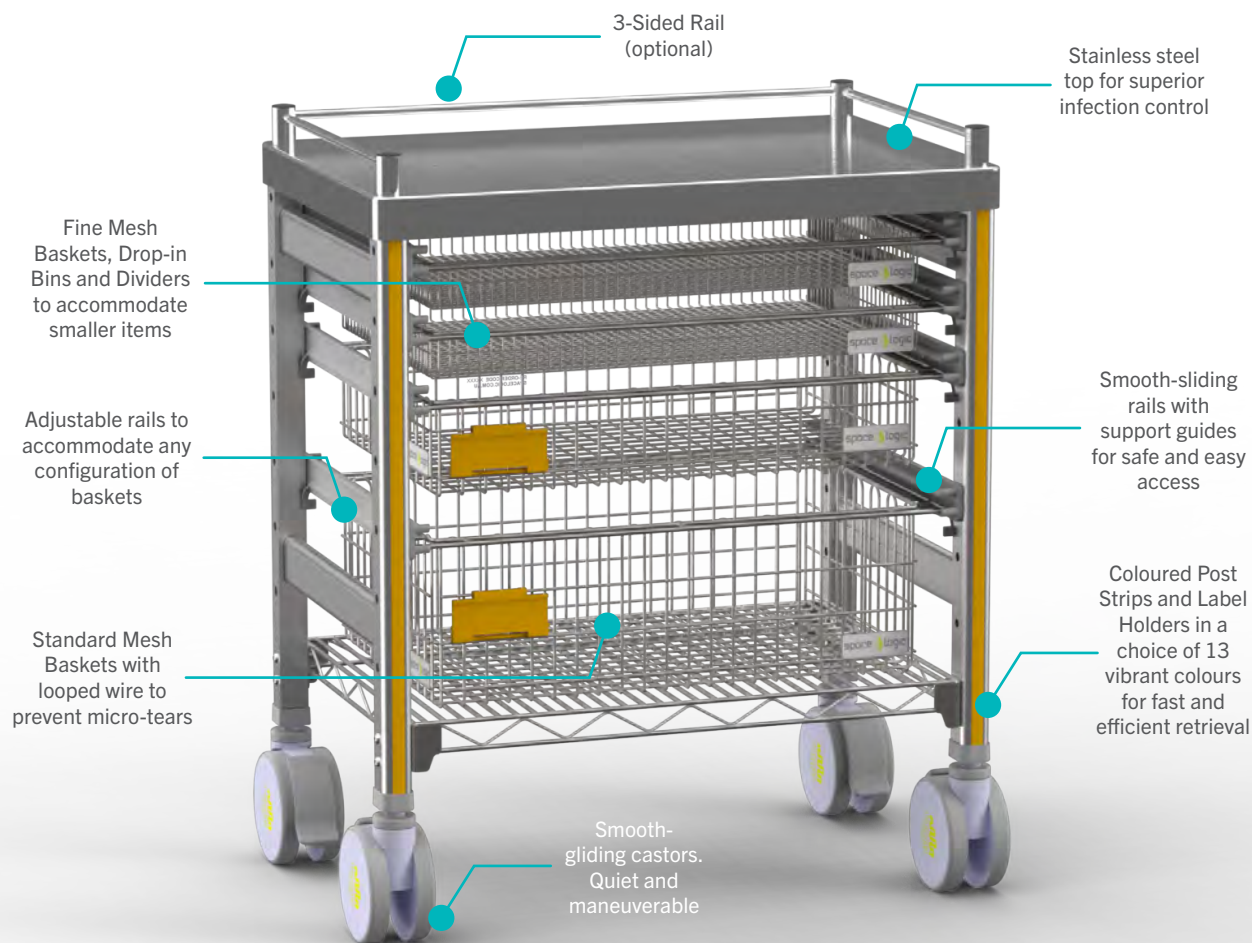

Superior quality. Best practice. Custom configured to suit.

Accessible, smooth-gliding and so easily maneuverable, our STERIRACK™ Medical carts are so much more than a simple medical storage cabinet on wheels.

STERIRACK™ Medical carts represent global best practice and cutting edge innovation.

Available in a huge selection of widths, heights and depths, in 1-bay and 2-bay configurations. Accessories include drop-in bins, dividers and colour-coded label holders and post strips in a choice of 13 vibrant colours, as well as many others.

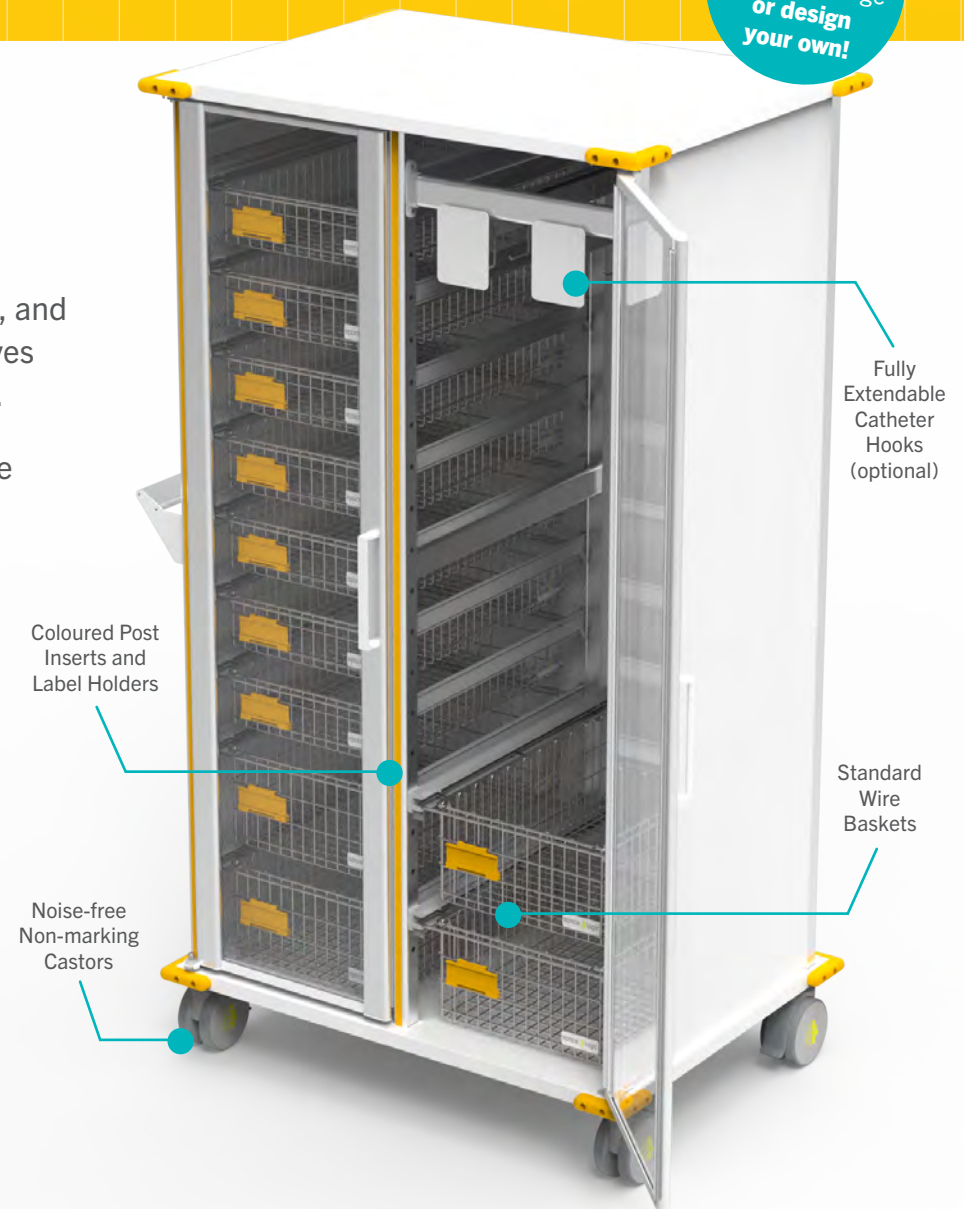

Choose from the huge range available, or work with a SpaceLogic Consultant to design your own.

An all new innovation from SpaceLogic!

STERIRACK™ Glass Door Carts are designed and manufactured in single-, double-, and triple-door models. The carts can be configured with your choice of baskets, shelves and accessories, including front coloured inserts in a choice of 13 vibrant colours.

- Hinged doors made up of an aluminium frame with dust seal and magnetic shutting mechanism.
- Door glass is laminated and toughened to withstand the rigors of ward life.
- Back and side infill panels are anti-microbial powder coated aluminium.
- Noise-free, non-marking, health-grade twin wheel castors maneuver easily around the wards. Two lockable at front.
- Each corner of the cart has bumpers for protection of doors and walls.
- A4 document holder on the cart side allows for identification of the cart and items inside.
- Cart has horizontal handles on each side to allow for ease of maneuvering.
- Door locks available on request.

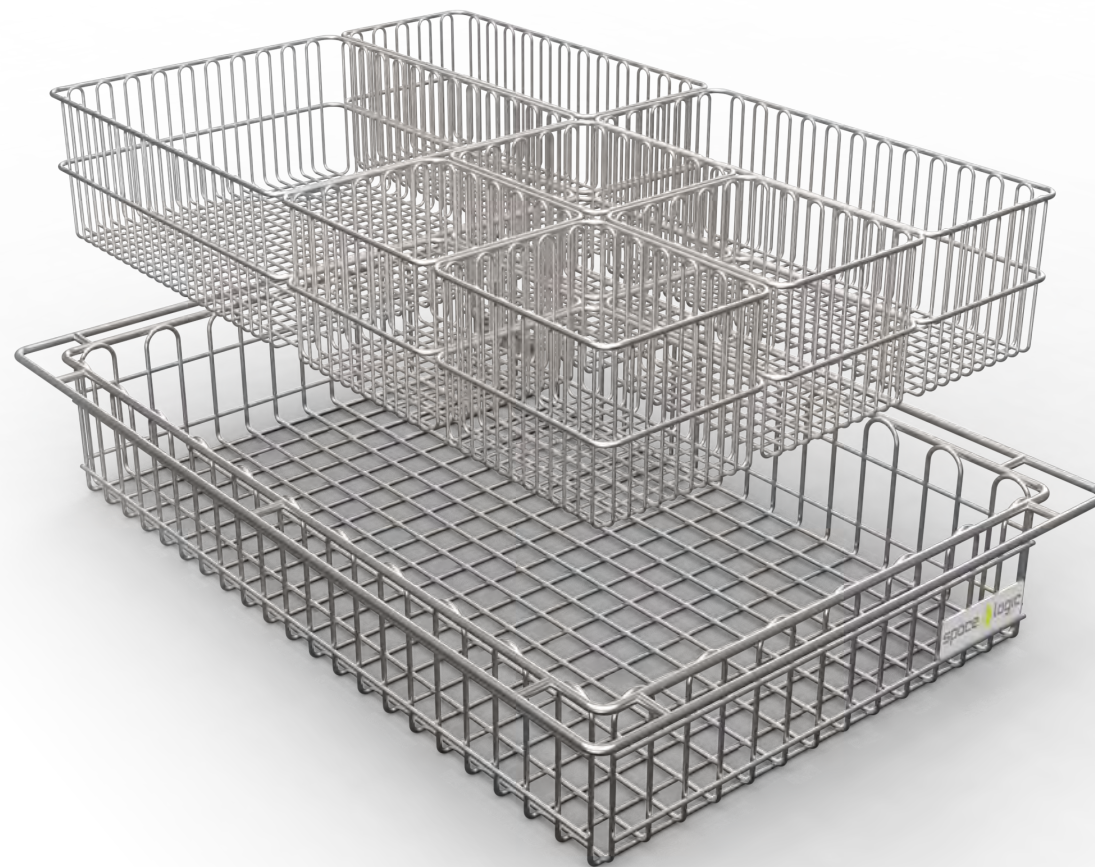

STERIRACK™ Accessories deliver customisation with no equal

STERIRACK™ System is the customisation king. Not only are installations customised to suit your room sizes and work flows, but a comprehensive range of accessories are available to FURTHER specialise your storage solution to suit your requirements.

- Wire Baskets (standard and fine mesh) in a range of sizes
- Shelving (fixed and adjustable) in a variety of sizes and styles
- Basket Dividers and Drop-in Bins in a range of sizes
- Label Holders and Post Strips in a choice of 13 vibrant colours
- Aisle Signs and Bay Signs
- Shelf Dividers and End Ledges in a range of sizes
- Catheter Hooks and Crutcher Racks
- Suture Shelves, Catheter Baskets and more

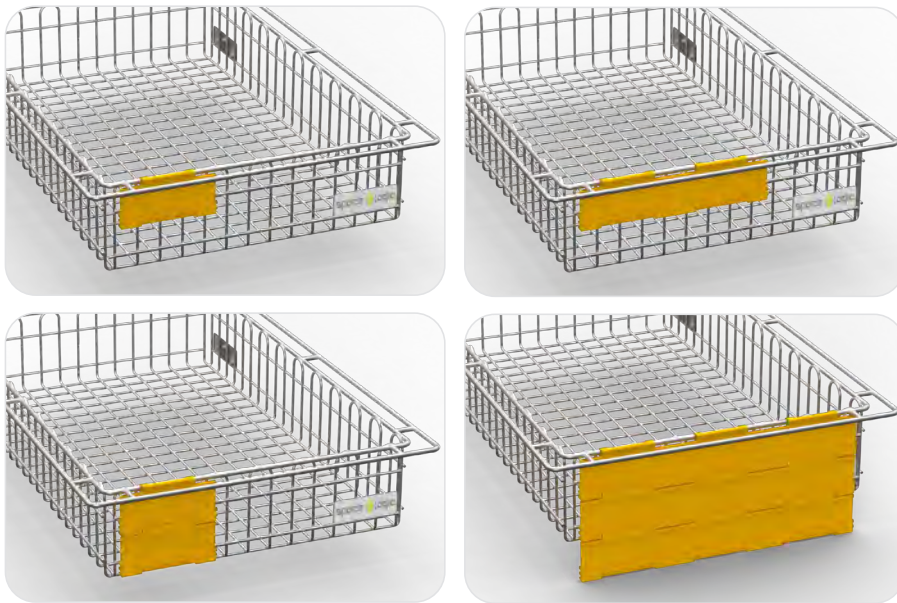

Check out our website regularly, as more accessories are continuously being added to the range.

Slash time spent hunting through storerooms

Nurses can now find consumables fast, and spend more time devoted to face-to-face patient care using STERIRACK™ Click 'n' Clip Label Holders in conjunction with our STERIRACK™ System.

Available in 13 vibrant colours, these revolutionary label holders click together in any configuration you need – vertically AND horizontally – and clip to STERIRACK™ baskets and shelving.

Looped wire eliminates sharp edges and potential micro-tears

A high quality, chrome finished wire bin that removes the risk of dust accumulation. The looped wire configuration eliminates sharp edges, giving a smooth feel and finish, eliminating the risk of potential cuts, scratches and product damage.

Available in a variety of sizes to enable maximum usage of storage space, and dividable to create smaller compartments for ultimate space efficiency. The semi-open front design gives excellent stock visibility.

- Coloured clip-on labels in a choice of 13 vibrant colours are provided for accurate stock identification.
- Panels mount off the wall for added cleanliness.
- Compliant with infection control standards and best practice.

MEDIBIN™ is a registered design available only through SpaceLogic.

What are the best next steps?

Project scope

The first step toward revolutionising your Clean Utility is a SpaceLogic site analysis. SpaceLogic can scope your project by visiting your facility either in person or online, or you can simply email empty room plans through to our consultants. We engage with all stakeholders, to fully understand all user expectations and project specifications before moving on to the next step.

Project design

During the project design phase we work with you to make sure you get maximum storage capacity within the available space, while staying within the project scope. SpaceLogic's specialist storage designers will supply detailed plans and photorealistic 3D renders for review, and any last minute changes from stakeholders can be accommodated. A service second to none.

Project installation

SpaceLogic's expert project managers and technicians will deliver and install your STERIRACK™ System in line with agreed project objectives, and in co-operation with other tradespeople where necessary. We make the installation process easy, working unobtrusively and efficiently so your day-to-day operations face minimal interruptions. You'll never look back!
