

SSC-105

Irrigation tower

Minor Equipment

SSC-105

Irrigation tower

The SSC-105 Irrigation Pole is a non-powered solution designed to reduce strain when raising up to four irrigation bags. Its trigger-operated mechanism allows each bag to be raised individually without lifting, while four independently operated hooks help maintain uninterrupted gravitational flow during bag changes.

Depth	26.5"
Width	26.5"
Height	89"
Hook Height	67-81"
